

Outdoor Irrigation System Removal / Non-Installation Confirmation

Customer Name: _____

Service Address: _____

City, State, ZIP: _____

Phone / Email: _____

Property Type: Residential Commercial

This form verifies the irrigation system status for the property listed above and confirms compliance with **Utah Code §19-4-112** and all required state and local backflow-prevention regulations.

Please select one:

A. Irrigation System Removed

By selecting this option, the homeowner or technician confirms that:

- An outdoor irrigation system previously existed and has been **permanently removed**.
- All components formerly connected to the potable water supply have been **fully removed**.
- Any remaining pipe, fittings, or connections have been **disconnected or permanently capped**.
- No cross-connection risk remains at this property.

B. No Irrigation System Has Ever Existed

By selecting this option, the homeowner confirms that:

- No outdoor irrigation system has ever been installed or connected to the potable water system.
- No piping, valves, or fittings exist that would indicate an irrigation connection.
- A backflow prevention assembly is **not required** unless an irrigation system is installed in the future.

By signing below, the homeowner acknowledges:

- No irrigation system may be connected or reconnected to the potable water system without prior notification to **Gorgoza Water Company**.
- Any future irrigation system must include a **Reduced Pressure Principle (RP) Backflow Assembly**, installed and tested by a certified professional.
- Documentation of certified installation and required backflow testing must be submitted to comply with state and local regulations.
